

REMARKS

Claims 1 and 3-10 are pending. No claim amendments are made herein.

To aid in the understanding of the data presented in Table A on p.4 of the response filed on December 3, 2010, the following visual data is resented:

P-MBOCA and C-MBOCA

P-MBOCA: binuclear
compound >96%
Room Temp.: light yellow
solid

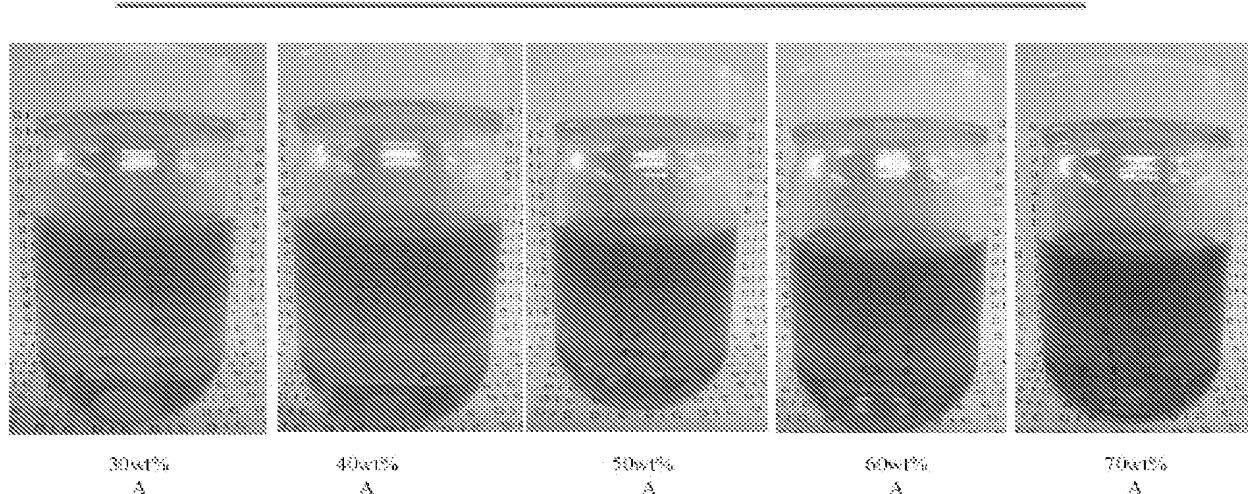

C-MBOCA(binuclear
compound 65%)
Room Temp.: transparent,
pale brown liquid

As shown in above figures, Binuclear compound cited in Document (left), and lower purity MBOCA Mixture in the Present Invention (Right) are much different.

The data presented below helps to visually understand how the Composition A, at 30%, 40%, 50%, 60% and 70%, appears after one week. The pictures show the state of the composition after one week.

Please refer to Example 1 in Table A on p.3 of the December 3, 2010 response:

C-MBOCA (binuclear compound 65%) and PTMG1000 After one Week

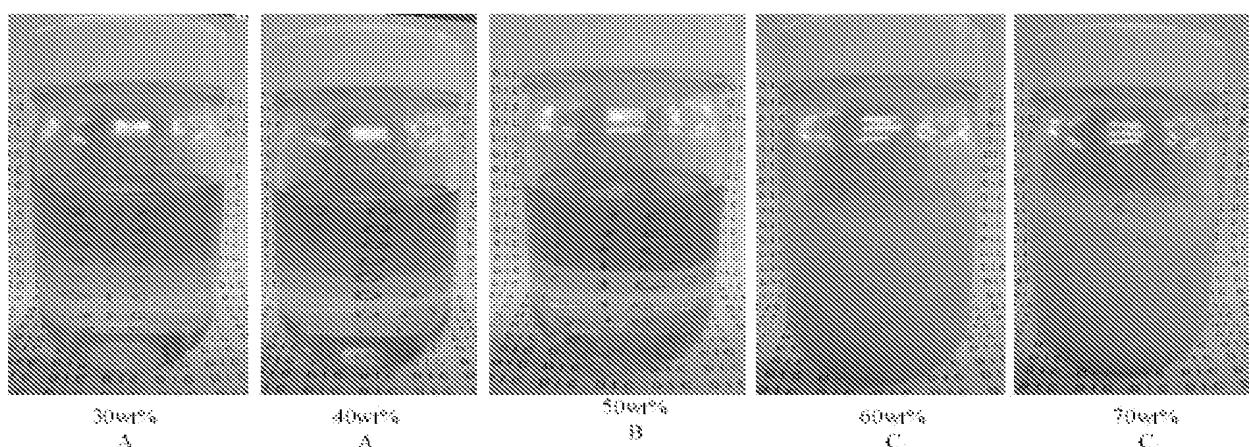

Data shown in Example 1 (after one week)

A: transparent, pale brown solution

Please refer to Comparative Example 1 in Table A of the December 3, 2010 response:

P-MBOCA (binuclear compound >98%) and PTMG1000 After one Week

Data shown in Comparative Example 1 (after one week)

A: transparent, pale brown solution B: hazy C: precipitates

The data above clearly further supports the unexpected effect of the claimed invention. It is respectfully requested that this evidence be considered and the rejection be reconsidered and withdrawn.

In view of this Supplemental Response, applicant believes the pending application is in condition for allowance. Please charge this fee and any other fees which may be due with respect to this paper, to Deposit Account No. 04-1105.

Dated: December 21, 2010
